

BEFORE THE SECURITIES COMMISSIONER
FOR THE STATE OF DELAWARE

SECURITIES
DIVISION

SEP 07 2005

DELAWARE

In the Matter of:

THOMAS WEISEL PARTNERS, LLC

Case No. 05-3-2

Respondent.

ADMINISTRATIVE CONSENT ORDER

WHEREAS, Thomas Weisel Partners, LLC ("TWP") is a broker-dealer registered in the State of Delaware; and

WHEREAS, coordinated investigations (the "Investigations") into TWP's activities in connection with certain conflicts of interest that research analysts were subject to during the period of approximately July 1999 through 2001 have been conducted by a multi-state task force and a joint task force of the U.S. Securities and Exchange Commission ("SEC"), the New York Stock Exchange ("Exchange"), and the National Association of Securities Dealers ("NASD") (collectively, the "regulators"); and

WHEREAS, TWP has cooperated with regulators conducting the investigation by responding to inquiries, providing documentary evidence and other materials, and providing regulators with access to facts relating to the investigations; and

WHEREAS, TWP has advised regulators of its agreement to resolve the issues raised in the investigations relating to its research practices; and

WHEREAS, TWP agrees to implement certain changes with respect to its research practices to achieve compliance with all regulations and any undertakings set forth or incorporated herein governing research analysts, and to make certain payments; and

WHEREAS, TWP, through its execution of this Consent Order, elects to permanently waive any right to a hearing and appeal under the Delaware Securities Act (6 Del. C. sec.

7325) with respect to this Administrative Consent Order (the "Order");

NOW, THEREFORE, the Securities Commissioner ("Commissioner"), as administrator of the Division of Securities of the Department of Justice for the State of Delaware, hereby enters this Order:

I. JURISDICTION/CONSENT

TWP admits the jurisdiction of the Commissioner, neither admits nor denies the Findings of Fact and Conclusions of Law contained in this Order, and consents to the entry of this Order by the Commissioner.

II. FINDINGS OF FACT

A. Background and Jurisdiction

1. Thomas Weisel Partners, LLC is a Delaware limited liability company with its headquarters and principal executive offices in San Francisco, California. TWP was formed as Portsmouth Capital LLC in September 1998, and changed its name to Thomas Weisel Partners LLC in February 1999.
2. TWP is registered with the Securities and Exchange Commission ("Commission"), is a member of the New York Stock Exchange, Inc. ("Exchange") and the NASD Inc. ("NASD") and is licensed to conduct securities business on a nationwide basis.
3. TWP describes itself as a "merchant bank providing investment banking, institutional brokerage, private client services, private equity and asset management exclusively focused on the growth sectors of the economy." TWP provides a comprehensive range of advisory, financial, securities research, and investment services to corporate and private clients. TWP also provides investment banking services to corporate clients.
4. TWP is currently registered with the Commissioner as a broker-dealer, and has been so registered since January 11, 1999.
5. This action concerns the time period of July 1999 through 2001 (the "relevant period"). During that time, TWP engaged in both research and investment banking ("IB") activities.

B. Overview

6. During the relevant period, TWP employed research analysts who provided research coverage of the issuers of publicly traded securities. TWP's equity research analysts collected financial and other information about a company and its industry, analyzed that information, and developed recommendations and ratings regarding a company's securities. TWP distributed its research product directly to its own client base. TWP's research was also distributed through subscription services such as Thomson Financial/First Call, Multex.com, Inc., and Zacks Investment Research (collectively referred to as "Public Services").
7. From February 1999 to June 1999, TWP maintained a 4-tiered ratings system: Strong Buy, Buy, Watch List, and Sell. In June of 1999, TWP renamed the Sell rating to Underperform. In August 1999, TWP renamed the Watch List rating to Market Perform so that its 4-tiered ratings system was: Strong Buy, Buy, Market Perform, and Underperform. That rating system remained intact until November 2001.
8. TWP ratings were heavily skewed towards "Buy" and "Strong Buy." For example, as of April 13, 2000, TWP covered approximately 230 stocks with 89% being rated either "Buy" or "Strong Buy" (42% were rated "Strong Buy" and 47% were rated "Buy"). In contrast, there was only 1 stock rated "Underperform." As of January 18, 2001, TWP covered approximately 268 stocks, with 80% being rated either "Buy" or "Strong Buy" (31% were rated "Strong Buy" and 49% were rated "Buy"), but none rated "Underperform."
9. As set forth below, written presentations prepared in connection with pitches for initial public offerings ("IPOs") often touted TWP's favorable coverage of other issuers and included research coverage as one of a number of services that TWP would provide in "aftermarket" support of an issuer's stock.

- 1 10. Research analysts participated in the pitch process for IPOs, secondary offerings and
2 merger and acquisition work that TWP sought to perform on behalf of publicly-traded
3 clients and potential clients. The analysts involved in the pitch process sometimes
4 included the same analysts who were providing or had provided research coverage
5 of the client or potential clients from whom TWP was seeking investment banking
6 business. In written presentations prepared in connection with these pitches, TWP
7 touted the past research "support" it had provided to its client or potential client, and
8 included charts that tracked its coverage and ratings, and the issuer's stock price.
9
10 11. TWP analysts considered prospective investment banking business in determining
11 whether to initiate or to continue to provide research coverage for issuers. TWP's
12 investment bankers participated in the evaluation of TWP research analysts, and a
13 portion of the TWP analysts' compensation was tied to the analysts' success in
14 helping TWP generate investment-banking business. TWP failed to disclose any of
15 these facts to its brokerage clients or to the general public.
16
17 12. TWP received at least one payment from another broker-dealer as consideration for
18 TWP's research coverage of a security. TWP failed to disclose the payment or the
19 amount thereof to its brokerage clients or to the general public.
20
21 13. On occasion, TWP paid other broker-dealers to initiate or to maintain research
22 coverage with respect to issuers for which TWP acted as an underwriter. The broker-
23 dealers that TWP paid to initiate or to maintain research coverage did not disclose
24 that they had received consideration for their research coverage of the securities.
25
26
27
28

1 C. TWP'S RESEARCH STRUCTURE CREATED CONFLICTS OF INTEREST FOR
2 RESEARCH ANALYSTS

3 Research Analyst Compensation Tied to Investment Banking Revenue

4 14. TWP tracked investment banking revenue attributable to research analysts. TWP
5 also tracked to research analysts the brokerage revenue generated from stocks that
6 the analysts covered. During the relevant period, the amount of fees TWP generated
7 from investment banking deals attributed to an analyst accounted for at least five
8 percent of that analyst's overall compensation. Additionally, TWP used the
9 brokerage commission revenue generated in the stocks covered by TWP analysts as
10 a factor in determining analysts' total compensation.
11

12
13 15. During the relevant period, TWP compensated its research analysts both directly and
14 indirectly on the amount of investment banking revenue they helped to generate.
15 Research analysts thus faced a conflict of interest between the incentive to help win
16 investment banking deals for TWP while being under an obligation to conduct and
17 publish objective research regarding those companies.

18 TWP's Investment Bankers Evaluated TWP's Research Analysts and Helped
19 Determine the Compensation They Received

20 16. During the relevant period, TWP organized research analysts and investment bankers
21 into "Tiger Teams" along industry groups such as telecommunications and software.
22 Tiger Teams coordinated the efforts of research and investment banking to identify
23 new business opportunities.
24

25 17. TWP investment bankers who worked with a TWP research analyst on investment
26 banking deals evaluated the research analyst's performance as part of an annual
27 performance evaluation. That evaluation was considered in setting the analyst's
28

1 compensation. This input from investment bankers further indicated to research
2 analysts the importance of satisfying the needs of investment bankers and their
3 clients and significantly hampered the independence of research reports that the
4 analysts issued.

5
6 **TWP Research Analysts Played Important Roles in "Pitches" To Win**
7 **Investment Banking Business, Promised Research Coverage for IPO**
8 **Clients, and Provided Coverage Immediately Following the Quiet Periods**

- 9 18. During the relevant period, research analysts played a pivotal role in winning
10 investment banking business for TWP. Once TWP's investment banking department
11 decided to compete for a company's investment banking business, particularly for an
12 IPO, research analysts played a critical role in obtaining that business.
- 13
14 19. One of a research analyst's significant responsibilities was to assist in TWP's sales
15 "pitch" where TWP explained to a company or an issuer why it should select TWP to
16 be the lead managing underwriter for the offering or to be a member of an
17 underwriting syndicate. According to TWP's October 2000 equity research job
18 descriptions, vice president-level analysts' duties and responsibilities included
19 "developing the ability to pitch and win corporate finance mandates." The job
20 description summary further stated that vice presidents "are building industry-wide
21 relationships that the Firm will monetize via a variety of brokerage and capital market
22 products."
23
- 24 20. The summary of TWP principal-level analysts' job description stated that they "have
25 built industry-wide relationships that the Firm can monetize via a variety of capital
26 markets products." TWP principal-level analysts' duties and responsibilities included:
27
28

1 Develop[ing] a Research Franchise that generates \$10-\$15 MM+ of
2 average annual revenues from multiple revenue streams
3 (Brokerage, CF, M&A, Private Equity) . . . [and] position[ing] the
4 Firm to pitch and win corporate finance mandates.
5 21. The summary of TWP partner-level analysts' job description stated as well that they
6 "have built industry-wide relationships that the Firm can monetize via a variety of
7 capital markets products." TWP partner-level analysts' duties and responsibilities
8 included:

9 Continually develop[ing] and maintain[ing] a Research Franchise
10 that generates \$20-\$30 MM of average annual revenues from
11 multiple revenue streams (Brokerage, Corporate Finance, M&A,
12 Private Equity) . . . [and] position[ing] the Firm to pitch and win
13 corporate finance mandates including lead managed transactions.
14 22. In advocating retention of TWP, research analysts provided material regarding their
15 research to be included in the pitch books presented to the company or issuer. They
16 also routinely appeared with investment bankers at the pitches to help sell TWP
17 services to the potential client. TWP pitch books to potential clients included
18 representations about the role the research analyst would play if TWP obtained the
19 business. In describing the "Role of Research," the pitch book also provided a
20 roadmap for the amount and type of coverage that the research department would
21 provide. Examples of analysts' participation in the "pitch" process are described
22 below.

23 **Loudcloud**

24 23. Loudcloud, Inc., now known as Opsware, is a company that provides business
25 internet infrastructure services. TWP participated as a member of the underwriting
26 syndicate in Loudcloud's March 9, 2001 IPO. Loudcloud's stock was quoted on the
27 NASDAQ National Market under the ticker symbol LDCL until August 2002, when the
28 company changed its name to Opsware. Since the name change, the company's
stock has been quoted under the ticker symbol OPSW.

1 24. TWP's relationship with Loudcloud began in February 2000 when the then chairman
2 and founder of Loudcloud contacted a TWP partner and senior research analyst
3 ("Loudcloud Senior Analyst"). Thereafter, the Loudcloud Senior Analyst and TWP
4 investment bankers met with Loudcloud to discuss potential financing for the
5 company.
6

7 25. Prior to Loudcloud's IPO, the Loudcloud Senior Analyst mentioned Loudcloud in a
8 periodic industry report dated June 19, 2000. TWP also invited Loudcloud to attend
9 its annual "Growth Forum" held in late June 2000. Thereafter, TWP solicited
10 underwriting work for Loudcloud's IPO in a presentation made on or about August 16,
11 2000. During the presentation, TWP touted its ability to provide "aftermarket
12 support," which included, in part, research coverage. The presentation provided case
13 studies on two companies that TWP had covered. The case studies highlighted the
14 amount and types of research, i.e., reports specific to the particular company,
15 periodic industry reports, and white papers that TWP provided for these two
16 companies, suggesting that TWP would do the same for Loudcloud. TWP also
17 highlighted the fact that it mentioned Loudcloud in a June 19, 2000 TWP report and
18 that Loudcloud had attended TWP's annual "Growth Forum" conference.
19
20

21 26. The presentation included biographical and professional information about the two
22 TWP analysts who would be covering the company along with a list of companies
23 that they previously and currently covered. The presentation also touted TWP's
24 ability to communicate Loudcloud's "story" through, in part, TWP's "all-star ranked
25 research coverage." In a November 4, 2000, e-mail, the Loudcloud Senior Analyst
26
27
28

boasted that "Loudcloud is a deal that I won, I lead [sic] this pitch with [a TWP vice president and junior research analyst]."

27. On September 22, 2000 and February 9, 2001, TWP investment bankers and the research analysts who worked on the Loudcloud IPO sent a memorandum to TWP's Commitment Committee in support of TWP's participating in the Loudcloud IPO.
28. On April 3, 2001, after TWP participated as an underwriter in the Loudcloud IPO, the Loudcloud Senior Analyst e-mailed senior Loudcloud management stating:
- "Gentlemen: this e-mail is to inform you that, as promised during the Thomas Weisel Partners [sic] IPO pitch, I initiated written research coverage on Loudcloud this morning – 25 days (to the hour) following the pricing of the offering on March 8th. Our First Call note we will be posted shortly and our +20 page written research report, that you reviewed this weekend and we discussed changes to yesterday, is being sent to editorial and printing today." TWP also provided research coverage of Loudcloud in other periodic industry reports or notes during 2001. TWP's Loudcloud research reports, notes, and other industry publications discussing Loudcloud were distributed through Public Services.

Gemplus

29. Another example of analyst participation in the pitch process is with respect to Gemplus International, S.A. ("Gemplus"), a French company that provides "smart" cards for wireless communications and transactions. TWP participated as a member of the underwriting syndicate in Gemplus' U.S. IPO of American Depositary Shares on December 8, 2000, and Gemplus' stock has since been quoted on the NASDAQ National Market under the ticker symbol GEMP.

1 30. TWP solicited underwriting work for the Gemplus U.S. IPO in a presentation to
2 company management on or about September 15, 2000. In the presentation, TWP
3 touted its ability to provide research coverage from "multiple angles" through reports
4 specifically related to the company as well as regularly published industry reports
5 highlighting several companies. TWP also presented a case study of research
6 coverage it provided on another company, Verisign, Inc. On a chart depicting
7 Verisign's trade volume and increasing stock price, TWP highlighted dates upon
8 which TWP published recommendations of Verisign's stock. In one instance, the
9 presentation states, "12/21/99 TWP upgrades [Verisign] to a strong buy. Stock jumps
10 \$35 in one day," suggesting that TWP could provide the same sort of coverage and
11 results for Gemplus.
12

14 31. A TWP partner and senior research analyst ("Gemplus Senior Analyst") had
15 previously developed a relationship with Gemplus management and was largely
16 responsible for TWP being selected as an underwriter for Gemplus' U.S. IPO. A
17 TWP vice-president and junior research analyst ("Gemplus Junior Analyst") assisted
18 the Gemplus Senior Analyst in his research of the company. According to the lead
19 TWP investment banker on the Gemplus U.S. IPO, Gemplus, in selecting TWP as an
20 underwriter, wanted "to make sure that [the Gemplus Senior Analyst] will be the lead
21 [analyst], with [the Gemplus Junior Analyst] on the deal. . . ."
22

24 32. A venture capital firm with whom TWP had a business relationship also played a role
25 in Gemplus awarding TWP with an underwriting slot on the IPO. The venture capital
26 firm, Gemplus' controlling shareholder, guaranteed TWP a "minimum total fee of \$3
27 million for being a member of the Gemplus underwriting syndicate."
28

33. On November 21, 2000, the TWP investment bankers, as well as the TWP research analysts who worked on the Gemplus U.S. IPO, sent a memorandum to TWP's Commitment Committee in support of TWP's participation in the Gemplus U.S. IPO. According to this memorandum, the TWP analysts prepared financial models after spending "extensive time with [the lead underwriter] and the company."
34. On January 3, 2001, the TWP analysts visited the venture capital firm's San Francisco office and discussed Gemplus, among several items, with two senior partners of the venture capital firm. On January 4, 2001, the Gemplus Junior Analyst e-mailed one of the partners of the venture capital firm, writing that "in keeping w/our commitment to support the [Gemplus] stock, we are initiating research coverage tomorrow, Fri., the first day possible after the 25-day quiet period expires in the States." The Gemplus Junior Analyst also advised the venture capital firm partner that "we have not yet had an opportunity to speak w/ [the new Gemplus CFO] regarding any substantive/necessary changes to our model and full report." The Gemplus Junior Analyst continued, "as such, we will publish an abbreviated note in the interim, and would like to set up a conference call as soon as possible to discuss any necessary changes so we can get the full report to our institutional client base." The Gemplus Junior Analyst attached a copy of TWP's European version of the Gemplus report to the e-mail and advised that "we will use as the starting point for any new revision."
35. On January 5, 2001, the Gemplus Senior Analyst e-mailed Gemplus' senior management, as well as partners at the venture capital firm, stating: "Gentlemen: As promised, I am pleased to send you this research note that was transmitted to First

1 Call this morning. This is our launch of research coverage on Gemplus, 25 days to
2 the hour, following the successful company public offering in the U.S. and Europe."
3 The Gemplus Senior Analyst continued in the e-mail, "we await your final comments
4 on our lengthy written research report that we have already sent you. Following our
5 joint discussions – we will follow through with the publication of the report. Again, it
6 has been a pleasure working with both the Gemplus and [venture capital]
7 management teams. . . We look forward to working together in 2001 and beyond." In
8 addition to soliciting comments of his research report from Gemplus management,
9 the Gemplus Senior Analyst solicited comments on the report from the controlling
10 shareholder of Gemplus. The Gemplus Senior Analyst published the full research
11 report on January 16, 2001.
12

- 13
14 36. The Gemplus Senior Analyst provided research coverage of the company until
15 August 1, 2001. TWP's Gemplus research reports, notes, and other industry
16 publications were distributed through Public Services.
17

18 **Research Department Made Coverage Decisions Based Upon Investment**
19 **Banking Concerns**

- 20 37. TWP's equity research department also made coverage decisions based, in part, on
21 investment banking concerns. TWP prepared research "Drop Lists" that detailed the
22 institutional commissions generated by the covered companies, the trading profit and
23 loss, the names of the institutional investors and venture capitalist firms who held
24 stock in the covered companies, and the banker feedback concerning whether to
25 drop research coverage. Explaining a January 2001 version of the research Drop
26
27
28

1 List, TWP's Chief Operating Officer of Investment Banking ("COO of Investment
2 Banking"), e-mailed TWP's Head of Corporate Finance, and TWP's Director of Sales:
3 I've made an attempt to get banking's feedback on potential banking business for
4 each of these clients. We should also assess the potential impact on affiliated
5 venture capitalists for those companies we decide to drop. . . I will be in touch to
6 schedule a meeting for us to review the list in more detail and provide specific
7 recommendations to [TWP's Chief Operating Officer] and [TWP's then acting Director
8 of Research].

- 9 38. With regards to the banker feedback section of a February 2001 Drop List, reasons to
10 "keep" research coverage included: "recent IPO," "M&A engagement," "good banking
11 client," "M&A prospects," "multiple fee opportunity," and "potential M&A" Reasons to
12 "hold" coverage included: "waiting for M&A fee (Jan 01)," and a named investor is
13 "considering investing."

14
15 Stamps.com

- 16 39. An example of TWP's decision to drop or effectively to cease research coverage is
17 the case of Stamps.com, Inc., a company that provided Internet postage services.
18 Stamps.com conducted its IPO on June 24, 1999, and its stock has since been
19 quoted on the NASDAQ National Market under the ticker symbol STMP. TWP
20 participated as a member of the underwriting syndicate for the IPO.
21
22 40. On July 21, 1999, a TWP partner and senior research analyst ("Stamps.com Senior
23 Analyst") initiated research coverage on Stamps.com with a "Buy" rating. TWP
24 continued its research coverage of Stamps.com in reports it issued during 1999 and
25 2000. TWP also issued other periodic industry reports or notes mentioning
26 Stamps.com during the relevant period. TWP's Stamps.com research reports, notes,
27
28

1 and other industry publications discussing Stamps.com were distributed through
2 Public Services.

3 41. The Stamps.com Senior Analyst maintained a "Buy" rating on Stamps.com until
4 October 29, 1999, the last date on which he issued a research note on the company.
5 On December 6, 1999, Stamps.com conducted a secondary offering. TWP was
6 again a member of the underwriting syndicate for that offering.
7

8 42. In late 1999, TWP transitioned research coverage on the company from the
9 Stamps.com Senior Analyst to a TWP vice president and junior research analyst
10 ("Stamps.com Junior Analyst"). On January 29, 2000, the Stamps.com Junior
11 Analyst initiated research coverage with a "Buy" rating. On February 7, 2000,
12 Stamps.com acquired another company and TWP provided Stamps.com with a
13 fairness opinion regarding the acquisition.
14

15 43. The Stamps.com Junior Analyst maintained his "Buy" rating on Stamps.com until
16 September 19, 2000 when he ceased publishing any additional research on the
17 company. During the time period that he actively covered the company, the
18 Stamps.com Junior Analyst maintained a "Buy" rating on Stamps.com despite the
19 steady decline of the company's stock price from \$35.12 on January 27, 2000 to
20 \$6.00 on September 19, 2000.
21

22 44. On November 27, 2000, the Stamps.com Junior Analyst e-mailed a TWP partner and
23 Director of East Coast Research (in December 2000, this TWP partner became the
24 acting Director of Research) explaining reasons why TWP should "kill," or
25 discontinue, research coverage on Stamps.com. The Stamps.com Junior Analyst
26 explained that: (1) Stamps.com was not "core" to the companies he was then
27
28

1 covering; (2) there was "no more [investment] banking [business] to be done"; and (3)
2 that there was "limited commission opportunity" as a market maker in Stamps.com's
3 stock.

4
5 45. With regard to the lack of additional investment banking business, the Stamps.com
6 Junior Analyst explained in more detail that: (1) TWP had been paid for the
7 Stamps.com IPO, a follow-on offering, and a fairness opinion for a merger; (2)
8 Stamps.com had retained another investment banking firm to review the company's
9 strategic options; and (3) contrary to his earlier belief, a Stamps.com wholly-owned
10 subsidiary was unlikely to do a 2001 IPO.

11
12 46. The Stamps.com Junior Analyst also explained the "sensitivities" associated with
13 dropping coverage. Those "sensitivities" included the fact that certain venture
14 capitalists, who were also TWP clients, had investments in Stamps.com. He advised
15 his supervisor that one venture capital firm "is a big [institutional] client and has
16 owned all the way down." Despite these "sensitivities," the Stamps.com Junior
17 Analyst pointed out to his supervisor that the venture capitalists "hired [another
18 investment banking firm] not us for potential M&A trade" and that there would be
19 "limited downside on [Stamps.com] stock from cutting research sponsorship."
20

21
22 47. On January 8, 2001, the acting Director of Research, responded to the Stamps.com
23 Junior Analyst's November 27, 2000 e-mail with a number of edits and instructions to
24 send the e-mail to other senior managers of TWP's Sales and Trading Department,
25 Private Client Department, and Corporate Finance for their "reactions" to the
26 Stamps.com Junior Analyst's recommendation. Senior TWP management did not
27 object to dropping research coverage on Stamps.com and, in response to the
28

1 Stamps.com Junior Analyst's e-mail, the head of TWP Corporate Finance advised
2 the Stamps.com Junior Analyst to "drop" coverage on Stamps.com. However, on
3 January 12, 2001, TWP's COO of Investment Banking e-mailed the Stamps.com
4 Junior Analyst advising him that the head of the firm wanted him to "hold on to this
5 stock for now" but that he "shouldn't feel that [he had] to do any work on it, just don't
6 drop it." The COO of Investment Banking further explained that TWP had a number
7 of venture capitalist backed stocks in the Stamps.com sector and that the head of the
8 firm "wants to manage this relationship carefully."

- 9
10
11 48. The Stamps.com Junior Analyst did not publish any research on Stamps.com after its
12 last note on September 19, 2000. However, TWP never issued a note that it was
13 dropping coverage on Stamps.com.

14 Verisign

- 15
16 49. Verisign, Inc. is a provider of digital trust services that enable businesses and
17 consumers to engage in commerce and communications. Verisign's IPO was on
18 January 29, 1998, and its stock has since been quoted on the NASDAQ National
19 Market under the ticker symbol VRSN. TWP did not participate in the underwriting of
20 this IPO.
21
22 50. On June 25, 1999, TWP, through a research report issued by a TWP partner and
23 senior research analyst ("Verisign Senior Analyst"), initiated research coverage on
24 Verisign with a "Buy" rating. TWP continued research coverage of Verisign in reports
25 issued during the relevant period. TWP also featured Verisign in other periodic
26 industry reports or notes during the relevant period. TWP's Verisign research
27
28

reports, notes, and other industry publications discussing Verisign were distributed through Public Services.

51. In November 1999, TWP transitioned coverage of Verisign from the Verisign Senior Analyst to a TWP vice president and junior research analyst ("Verisign Junior Analyst"). The Verisign Junior Analyst maintained the "Buy" rating on Verisign until December 21, 1999, when he upgraded his rating to a "Strong Buy." He maintained that rating until January 25, 2001, when he downgraded Verisign's rating to a "Buy." After the Verisign Junior Analyst advised Verisign's CEO that he was downgrading the stock, the Verisign CEO called a TWP partner and demanded that TWP fire the Verisign Junior Analyst. On February 2, 2001, TWP terminated the Verisign Junior Analyst, along with a number of other research analysts, and transitioned Verisign coverage.

52. On April 16, 2001, the Verisign Senior Analyst re-initiated research coverage on Verisign with a "Buy" rating. The Verisign Senior Analyst also e-mailed a number of TWP investment bankers a copy of his research report and advised them that he had "spoken at length with [Verisign's CFO and CEO] re: possible TWP banking at Verisign, they will make available last week of May for us to pull together a presentation they have asked me to co-ordinate. Please advise who wants to be involved." On April 27, 2001, the Verisign Senior Analyst upgraded Verisign's rating to a "Strong Buy."

53. The Verisign Senior Analyst and TWP investment bankers prepared a pitch presentation for Verisign management. On May 29, 2001, the Verisign Senior Analyst and TWP investment bankers drove to Verisign's offices in Silicon Valley and

made an investment banking pitch to the company's management. The pitch book prepared for the May 29, 2001 presentation touted TWP's research role as a "strong supporter of Verisign's story," and the Verisign Senior Analyst's recent upgrade of the stock to a "Strong Buy."

54. The Verisign Senior Analyst continuously covered Verisign from April 16, 2001 to September 10, 2001, despite his participation in TWP's pitch to Verisign for investment banking business. TWP transitioned research coverage of Verisign on October 26, 2001, from the Verisign Senior Analyst to another analyst who then initiated coverage with a "Buy" rating.

D. TWP ISSUED RESEARCH REPORTS ON THREE COMPANIES THAT WERE NOT BASED ON PRINCIPLES OF FAIR DEALING AND GOOD FAITH AND DID NOT PROVIDE A SOUND BASIS FOR EVALUATING FACTS, CONTAINED EXAGGERATED OR UNWARRANTED CLAIMS ABOUT THESE ISSUERS, AND/OR CONTAINED OPINIONS FOR WHICH THERE WAS NO REASONABLE BASIS

InfoSpace

55. InfoSpace, Inc., is a diversified technology and services company. TWP was an underwriter for InfoSpace's March 30, 1999 secondary offering. On April 1, 1999, a TWP partner initiated coverage of InfoSpace with a "Buy" rating. TWP maintained its "Buy" rating on InfoSpace through December 7, 1999. Shortly thereafter, TWP transitioned coverage of InfoSpace from a TWP partner to a vice president and junior research analyst ("InfoSpace Research Analyst"). InfoSpace's stock trades on the NASDAQ National Market under the ticker symbol INSP.

56. In January 2000, the InfoSpace Research Analyst initiated his coverage on InfoSpace with a "Buy" rating, which he maintained until he lowered it to "Market Perform" in July 2001. During that time, the price of InfoSpace's stock declined from \$43 to about \$2. Despite his "Buy" rating, as early as January 2001 and continuing over the next four months, the InfoSpace Research Analyst had serious doubts about InfoSpace's business prospects and was privately telling others that the stock was not a buy and to "get out of" InfoSpace.
57. In January 2001, the TWP InfoSpace Research Analyst submitted a draft InfoSpace research note to a TWP supervisory analyst for review prior to publication. In the draft report, the InfoSpace Research Analyst recommended that investors await certain information from the company "before considering purchasing shares of INSP." The supervisory analyst edited the report suggesting that the InfoSpace Research Analyst remove the language above, and advised him that "if the stock is BUY rated, we cannot tell investors not to buy the stock." Rather than adjust the buy rating, the InfoSpace Research Analyst issued his report on January 11, 2001 with the edits the supervisory analyst suggested.
58. The InfoSpace Research Analyst privately e-mailed others explaining that he did not think the stock should be rated a "Buy." For example, on January 22, 2001, the InfoSpace Research Analyst explained to a TWP salesperson: "I can't frickin believe that I still have [InfoSpace] as a buy rating. I need a drink." In an e-mail later that same day to a TWP research associate who was working with him, the InfoSpace Research Analyst explained:

1 while I don't want to piss off [InfoSpace's CEO] I also don't care
2 that much . . . I think INSP is dead \$ and that upside catalysts are
3 limited. I don't talk on the stock and the buy rating only gives me
access to mgmt for info on wireless.

4 59. Within minutes of sending this e-mail to his assistant, the InfoSpace Research
5 Analyst e-mailed TWP's Head of the Product Management Group, TWP's Director of
6 Sales and TWP's acting Director of the Research Department about changes in
7 InfoSpace's management which indicated to the InfoSpace Research Analyst that the
8 company's ability to execute a wireless plan was "probably diminishing." The
9 InfoSpace Research Analyst further explained that the:
10

11 heart of the new mgmt team is out and we are left with the same
12 mgmt team that was in place back in April. I did not have
13 confidence in that previous mgmt team's ability to take the company
14 to the next level and I remain skeptical on the company's near term
outlook now. I may be calling the bottom and [InfoSpace's CEO]
will be pissed, but this stock is not a buy.

15 60. Later that same day, the InfoSpace Research Analyst, responding to some of the
16 acting Director of Research's questions, stated:
17

18 I do not think INSP falls much, but I cannot comprehend
19 recommending people buy this . . . would like to swap out of INSP
20 and into [Openwave Systems ("Openwave"), an InfoSpace
competitor]. . . I have been verbally saying to get out of INSP . . .
21 basically can sit here with a buy and never speak on stock or I can
22 downgrade. I do not want to piss of [InfoSpace's CEO], but I
should have downgraded stock long ago.

23 61. On January 23, 2001, the InfoSpace Research Analyst sent a draft copy of a new
24 research note with a "Buy" rating on InfoSpace to a supervisory analyst for review.
25 The draft research note stated, in part: "we recommend that investors remain
26 cautious on the stock" The supervisory analyst e-mailed the InfoSpace
27 Research Analyst, stating: "we cannot tell investors to 'remain cautious' on a BUY-
28

1 rated stock." The InfoSpace Research Analyst edited the note and deleted the
2 "remain cautious" language as the supervisory analyst suggested and TWP
3 published the note that day.
4

5 62. Later in the morning on January 23, the InfoSpace Research Analyst sent e-mails to
6 a number of people explaining that he should have downgraded the stock. He first e-
7 mailed his assistant, explaining: "I saw that some people downgraded INSP this
8 morning . . . I want the stock to increase before we downgrade." The InfoSpace
9 Research Analyst next explained to TWP's head of sales: "I never did the
10 downgrade. I missed it weeks ago. Wanted to speak with mgmt first . . . also I'm
11 hoping shares rebound over the next few weeks. . . then I'll downgrade." The
12 InfoSpace Research Analyst also e-mailed a TWP investment banker: "Yea. I should
13 have downgraded INSP last night. I want to have a call with [InfoSpace's CEO] and
14 tell him I'm going to do it before I do it."
15

16
17 63. From January 29 through February 13, 2001, the InfoSpace Research Analyst
18 continued privately to tell the sales and trading departments, and investors with
19 whom he spoke, that he recommended swapping out of InfoSpace and into
20 Openwave. For example, on January 29, the InfoSpace Research Analyst, in an e-
21 mail intended for TWP internal use only, wrote to the sales and trading departments
22 that InfoSpace's "2001 guidance will be negative. Swap into Openwave." That same
23 morning, the InfoSpace Research Analyst also e-mailed TWP's head of product
24 management, asking him to mention during the morning call with the sales and
25 trading departments that investors should swap out of InfoSpace and into Openwave.
26
27
28

1 64. While privately telling TWP sales and trading personnel and investors with whom he
2 spoke to swap out of InfoSpace, the InfoSpace Research Analyst nonetheless
3 published yet another company research note on January 30, 2001 with a "Buy"
4 rating. Later that morning, the TWP InfoSpace Research Analyst responded as
5 follows to an e-mail from an individual at another broker-dealer that noted another
6 broker-dealer was cutting its earnings per share estimates on InfoSpace: "We did the
7 same. Although I still think that '01 numbers are complete bull-shit. . . ."

9 65. On February 5, 7, and 11, 2001, the TWP InfoSpace Research Analyst again sent e-
10 mails to TWP's sales and trading departments, stating in part: (1) "Swap from INSP
11 to [Openwave]"; (2) "We believe accounts should wait on the sidelines until the
12 company gives greater clarity on its revised strategic plan"; and (3) "we are still
13 adopting a wait and see attitude until we gain greater confidence that the company
14 will successfully manage the transition from its consumer services business."

15
16
17 Despite his private comments to the contrary, on February 13, 2001, the InfoSpace
18 Research Analyst issued a research note in which he reiterated his "Buy" rating.

19 66. From February 13, 2001 to April 25, 2001, the InfoSpace Research Analyst did not
20 issue any new research reports or notes on InfoSpace, and the stock price declined
21 more than 20%, from \$5.00 to \$3.91. On April 25, the InfoSpace Research Analyst
22 e-mailed the Deputy Director of Research (on April 16, 2001, a new Director of
23 Research began working at TWP and the acting Director of Research became the
24 Deputy Director of Research), explaining:

25
26 At some point we need to discuss this stock. They report today
27 post-close. I have never bothered to downgrade the stock, but
28 made comments to swap into [an InfoSpace competitor]. I think

1 that any [revenue opportunity] for TWP (i.e. banking) has fallen
2 apart so actions can be taken.

3 67. The Deputy Director of Research responded to the InfoSpace Research Analyst and
4 asked in part, "What are our commissions in INSP? What is it's [sic]current market
5 cap?" The Deputy Director of Research also told the InfoSpace Research Analyst
6 that he would run the potential drop in coverage by other TWP department directors
7 to "build a consensus course of action." The InfoSpace Research Analyst responded
8 to the Deputy Director of Research explaining that TWP's commissions were:
9

10 \$145k to-date (\$140 in jan/feb) when we told people to swap into
11 [the InfoSpace competitor]. We have very strong relationships [a
12 TWP partner and senior research analyst and InfoSpace's CEO]. . .
13 but I do not get the sense that the bankers care anymore.
14 Maintaining coverage in [short term] is not a big problem since I've
15 got the quarterly report 'automated' . . . thanks.

16 68. The Deputy Director of Research e-mailed a number of TWP department directors
17 and other research analysts to ascertain if they had any problem with dropping
18 research coverage or whether other analysts wanted to pick up coverage of
19 InfoSpace. The other TWP department directors did not object to dropping coverage
20 and none of the other TWP research analysts wanted to pick up coverage of
21 InfoSpace. On April 26, 2001, the InfoSpace Research Analyst issued another
22 research note on InfoSpace and reiterated his "Buy" rating on the company.

23 69. On May 2, 2001, the Deputy Director of Research e-mailed the InfoSpace Research
24 Analyst as follows:

25 Engineer whatever your desired outcome is on this one. If you
26 want to drop [InfoSpace], I will support you. No interest in it from
27 the media guys or consumer guys [i.e., TWP research analysts],
28 and [the head of trading] doesn't care. If you like the insight and
get some trading commissions and it helps your franchise, then

1 keep it. If it is a distraction that doesn't help your impact with
2 accounts then . . . Thanks.

- 3 70. On May 30, 2001, the InfoSpace Research Analyst, apparently responding to an e-
4 mail from another one of his assistants, stated: "I agree re: INSP. I hate having it as
5 a buy, but nothing I can do now" The InfoSpace Research Analyst maintained
6 his "Buy" rating on InfoSpace until July 25, 2001 when he finally downgraded the
7 stock to a "Market Perform" rating. He published his last research note on InfoSpace
8 on November 26, 2001, again with a "Market Perform" rating. In this report, the
9 InfoSpace Research Analyst also explained that he was discontinuing his research
10 coverage of InfoSpace.
11

12 **Level 3 Communications**

- 13
14 71. Level 3 Communications, Inc. is a telecommunications and information services
15 company that operates an advanced international facilities-based communications
16 network based on Internet Protocol technology. Level 3's stock trades on the
17 NASDAQ National Market under the ticker symbol LVLT.
18
19 72. TWP commenced its research coverage of Level 3 with a "Buy" rating and a year-end
20 \$100 price target on September 15, 2000, when the stock opened at \$78.25 per
21 share. TWP maintained its "Buy" rating on Level 3 even as the stock price declined
22 from \$78.25 per share to \$5.97 per share on June 18, 2001. Not until June 19, 2001
23 did TWP downgrade its rating of Level 3 to "Market Perform." TWP continued to
24 cover Level 3 until October 26, 2001, when it discontinued coverage. TWP re-
25 initiated coverage on Level 3 on January 20, 2004.
26
27 73. On May 21, 2001, when TWP rated Level 3 a "Buy" and its shares were trading at
28

1 \$13.06, another firm covering Level 3 lowered its rating from "Strong Buy" to "Market
2 Underperform." TWP's Deputy Director of Research, who was aware of the
3 downgrade, e-mailed the TWP vice president and research analyst covering the
4 stock ("Level 3 Analyst") about the "Buy" rating stating: "doesn't sound like a buy." In
5 a series of e-mails that day, the Level 3 Analyst responded to the inquiries
6 concerning the "Buy" rating and explained that he wanted to delay the downgrade to
7 ensure that Level 3 executives attended a conference that TWP sponsored:
8

9
10 • It isn't [a buy]. I'm waiting until after the conference [TWP's
11 annual "Growth Forum" conference], and before the next quarter to
12 downgrade. If we do it now it won't look as aggressive as if we do it
13 in front of their quarter. So we'll probably downgrade around the
14 beginning of July. The stock isn't going to make a significant move
until then. We expect it will probably trade in the mid-teens. We're
expecting the stock to move down into single digits after another
"average" quarter, and possible downward revision in estimates.

15 • There is also the issue of wanting to ensure that they come
16 to our conference and speak on our panel. If I downgrade right
17 now they will assuredly pull from our conference and we can't
afford that.

18 • We have always maintained the stock is a speculative buy.
19 We've been very clear that there were issues on this name, but that
20 as long as you knew what you were getting into it was a good stock
21 to trade. Just recently it has become very clear that the company
22 [is] settling into a single market company, and the issues haven't
gone away. In my commentary to the clients I am positioning it as
a name that they can still trade, but one that will probably see a
downward trend before a significant upward movement.

23
24 74. On May 31, 2001, in response to an e-mail from TWP's Director of Communications
25 Services Research advising that he had just had a conversation with a firm that was
26 "very negative on level3," the Level 3 Analyst stated:

27 we have been negative on the name as well. I've basically been
28 telling our clients that it is a great short. They're on the verge of

1 laying off almost 1,000 people (not yet announced yet). They are
2 still trading at a premium valuation to Williams and 360. I haven't
3 lowered the rating mainly because I need them to show up at our
4 conference. If I lower to a [Market Perform] I guarantee they won't
5 attend. We'll lower the rating after the conference, in front of the
6 quarter.

75. Despite the Level 3 Analyst's view of the company expressed in the May 21 and 31, 2001, e-mails, he maintained his "Buy" rating in the stock for almost another month, until he finally downgraded the stock to "Market Perform" on June 19, 2001.

8 **Sprint FON Group**

76. Sprint FON Group is comprised of Sprint's wireline telecommunications operations, including long distance, local phone, product distribution and directory publishing.

9 Sprint FON Group's stock trades on the NYSE under the ticker symbol FON.

77. On June 13, 2001, before initiation of coverage and the announcement of a rating, the TWP vice president and junior research analyst assigned to cover the stock ("FON Research Analyst") attended a meeting at FON's headquarters with members of the FON management. Following this meeting, the FON Research Analyst e-mailed the Director of Communications Services Research, stating:

19 this is a market perform company. No 2 ways about it. However,
20 I'm aware of the conflict [sic] that is arising due to a better than
21 average probability of our getting on an FON convert deal. Need to
22 speak to you about the rating. We could go out with a Buy based
23 on our belief that they are going to accomplish a couple of things,
24 and then explain that failure to do so will cause us to downgrade.
25 We're protected in that case. Let's talk tomorrow.

78. On June 19, 2001, TWP initiated coverage of FON with a "Buy" rating. In that report, TWP did not disclose that one reason that it had made a "Buy" recommendation was the fact that TWP hoped to obtain investment banking business from Sprint.

1
2 **E. TWP RECEIVED PAYMENT IN CONSIDERATION OF ITS PROVIDING**
3 **RESEARCH COVERAGE OF HOTJOBS.COM**

4 79. Between 1999 and 2001, TWP received payment from the proceeds of at least one
5 underwriting to compensate the firm for services that included publishing research on
6 the issuer. Despite having an obligation to do so, TWP failed to disclose in research
7 reports or elsewhere that it received the payment, in part, as compensation for
8 issuing the reports.
9

10 80. In August 1999, Hotjobs.com, Ltd., conducted an IPO for which another broker-dealer
11 acted as lead underwriter. TWP was not included in the syndicate for the Hotjobs
12 IPO. Although not a member of the original syndicate, TWP did act as an underwriter
13 for a Hotjobs.com secondary offering that took place on November 10, 1999.
14

15 81. In connection with the Hotjobs IPO, the lead underwriter for the Hotjobs IPO made a
16 payment of \$40,000 to TWP by a check dated November 4, 1999. The lead
17 underwriter's records concerning the IPO indicate that the lead underwriter made the
18 payment in settlement of a "guaranteed" selling concession to be paid in either stock
19 or cash. The lead underwriter's records indicate that it guaranteed the selling
20 concession to TWP in consideration of the fact that "[a TWP research partner] will
21 pick up research." TWP did not disclose or cause to be disclosed the fact of this
22 payment.
23

24 82. On September 9, 1999, TWP, through a research report issued by the TWP research
25 partner, initiated research coverage on Hotjobs.com with a "Buy" rating. TWP
26 continued its research coverage concerning Hotjobs.com in reports it issued during
27
28

1 1999 and 2000. TWP upgraded Hotjobs.com to a "Strong Buy" on February 16,
2 2000.

3 83. TWP also provided research coverage to Hotjobs.com in other publications during
4 1999 and 2000. TWP's Hotjobs.com research reports, notes, and other publications
5 were distributed through Public Services.
6

7 84. TWP did not disclose that it had received consideration, or the amount thereof, for its
8 research or other publications concerning Hotjobs.com in any of its publications
9 concerning Hotjobs.com.
10

11 **F. TWP FAILED TO ENSURE PUBLIC DISCLOSURE OF PAYMENTS IT MADE**
12 **FROM THE PROCEEDS OF UNDERWRITINGS TO BROKERAGE FIRMS TO**
13 **ISSUE RESEARCH COVERAGE REGARDING ITS INVESTMENT BANKING**
14 **CLIENTS**

15 85. During the relevant period, TWP paid portions of certain underwriting proceeds to
16 other brokerage firms to initiate or continue research coverage on issuers for whom
17 TWP served as lead or co-manager. TWP knew that these payments were, in part,
18 for research. TWP did not take steps to ensure that the brokerage firms it paid to
19 initiate or continue coverage of its investment banking clients disclosed that they had
20 been paid to issue such research. Further, TWP did not disclose or cause to be
21 disclosed in offering documents or elsewhere the fact of or reason for such
22 payments.

23 **Arena Pharmaceuticals**

24 86. In June 2001, TWP acted as lead underwriter for a secondary offering of securities by
25 Arena Pharmaceuticals, Inc. In connection with that underwriting, TWP made
26 payments totaling \$325,000 to three broker-dealers in consideration of their providing
27 research coverage of Arena Pharmaceuticals stock. The check stub for each of the
28 payments described the payment as "Research Fees for Arena Pharmac." TWP did

not ensure these payments were disclosed to the public by the broker-dealers in their published reports on Arena Pharmaceuticals.

Proxicom

87. In October 1999, TWP acted as lead underwriter for a secondary offering of securities by Proxicom, Inc. In connection with that underwriting, TWP made payments totaling \$50,000 to two firms in consideration of those firms providing research coverage concerning Proxicom securities. The check stub for each of those payments indicated that the check was in consideration of "Research Proxicom." TWP did not ensure these payments were disclosed to the public by the broker-dealers in their published reports on Proxicom. TWP included another \$25,000 for payment to a third firm in its expense budget for the Proxicom underwriting syndicate. However, TWP did not pay that firm. TWP's accounting records indicate the payment was "held" until that firm "start[ed] research coverage."

G. TWP FAILED TO SUPERVISE ADEQUATELY ITS RESEARCH ANALYSTS AND INVESTMENT BANKING PROFESSIONALS

88. During the relevant period, TWP's management failed to monitor adequately the activities of the firm's research and investment banking professionals to ensure compliance with NASD and NYSE rules and the federal securities laws. Among other things, this failure to supervise gave rise to and perpetuated the above-described violative conduct.

III. CONCLUSIONS OF LAW

1. The Commissioner has jurisdiction over this matter pursuant to 6 Del. C. sec. 7325.
2. The Commissioner finds the following relief appropriate and in the public interest.
3. The Commissioner finds the above conduct is in violation of 6 Del. C. secs. 7316(a)(7) and (10).

4. Nothing in this Order shall be construed as an admission or finding of fraud.

IV. ORDER

On the basis of the Findings of Fact, Conclusions of Law, and TWP's consent to the entry of this Order, for the sole purpose of settling this matter, prior to a hearing and without admitting or denying any of the Findings of Fact or Conclusions of Law.

IT IS HEREBY ORDERED:

1. This Order concludes the Investigations by the Commissioner and any other action that the Commissioner could commence under the Delaware Securities Act (6 Del. C. Ch. 73) on behalf of the State of Delaware as it relates to TWP, or its affiliates, or the current or former directors, officers or employees of TWP or its affiliates arising from or relating to the subject of the Investigations, provided however, that excluded from and not covered by this paragraph 1 are any claims by the Commissioner arising from or relating to enforcement of the "Order" provisions contained herein.

2. TWP will CEASE AND DESIST from engaging in acts in violation 6 Del. C. secs. 7316(a)(7) and (10) and will comply with 6 Del. C. secs. 7316(a)(7) and (10) and will comply with the undertakings of Addendum A, incorporated herein by reference.

3. If payment is not made by TWP or if TWP defaults in any of its obligations set forth in this Order, the Commissioner may vacate this Order, at its sole discretion, upon 10 days notice to TWP and without opportunity for administrative hearing and TWP agrees that any statute of limitations applicable to the subject of the Investigation and any claims arising from or relating thereto are tolled from and after the date of this Order.

4. This Order is not intended by the Commissioner to subject any Covered Person to any disqualifications under the laws of any state, the District of Columbia or Puerto Rico (collectively, "State"), including, without limitation, any disqualifications from relying upon the State registration exemptions or State safe harbor provisions.

"Covered Person" means TWP, or any of its officers, directors, affiliates, current or

former employees, or other persons that would otherwise be disqualified as a result of the Orders (as defined below).

5. The SEC Final Judgment, the NYSE Stipulation and Consent, the NASD Letter of Acceptance, Waiver and Consent, this Order and the order of any other State in related proceedings against TWP (collectively, the "Orders") shall not disqualify any Covered Person from any business that they otherwise are qualified, licensed or permitted to perform under applicable law of the State of Delaware and any disqualifications from relying upon this state's registration exemptions or safe harbor provisions that arise from the Orders are hereby waived.
6. For any person or entity not a party to this Order, this Order does not limit or create any private rights or remedies against TWP including, without limitation, the use of any e-mails or other documents of TWP or of others regarding research practices or limit or create liability of TWP or limit or create defenses of TWP to any claims.
7. Nothing herein shall preclude the Commissioner, its departments, agencies, boards, commissions, authorities, political subdivisions and corporations, other than the Commissioner and only to the extent set forth in paragraph 1 above, (collectively, "State Entities") and the officers, agents or employees of State Entities from asserting any claims, causes of action, or applications for compensatory, nominal and/or punitive damages, administrative, civil, criminal, or injunctive relief against TWP in connection with certain research and/or banking practices at TWP.
8. TWP agrees not to take any action or to make or permit to be made any public statement denying, directly or indirectly, any finding in this Order or creating the impression that this Order is without factual basis. Nothing in this paragraph affects TWP's: (i) testimonial obligations, or (ii) right to take factual or legal positions in defense of litigation or in defense of other legal proceedings in which the Commissioner is not a party.

9. This Order shall be binding upon TWP and its successors and assigns. Further, with respect to all conduct subject to Paragraph 2 above and all future obligations, responsibilities, undertakings, commitments, limitations, restrictions, events, and conditions, the terms "TWP" and "TWP's" as used herein shall include TWP's successors and assigns (which, for these purposes, shall include a successor or assign to TWP's investment banking and research operations, and in the case of an affiliate of TWP, a successor or assign to TWP's investment banking or research operations).

V. MONETARY SANCTIONS

IT IS FURTHER ORDERED, that:

As a result of the Findings of Fact and Conclusions of Law contained in this Order, TWP shall pay a total amount of \$12,500,000.00. This total amount shall be paid as specified in the SEC Final Judgment as follows:

1. Five million dollars (\$5,000,000) to the states (50 states, plus the District of Columbia and Puerto Rico) (TWP's offer to the state securities regulators hereinafter shall be called the "state settlement offer"). Upon execution of this Order, TWP shall pay the sum of \$50,000.00 of this amount to the Commissioner as a civil monetary penalty pursuant to 6 Del. C. sec. 7325 to be deposited in the Investor Protection Fund, 6 Del. C. sec. 7329. The total amount to be paid by TWP to state securities regulators pursuant to the state settlement offer may be reduced due to the decision of any state securities regulator not to accept the state settlement offer. In the event another state securities regulator determines not to accept TWP's state settlement offer, the total amount of the Delaware payment shall not be affected, and shall remain at \$50,000.00;
2. Five million dollars (\$5,000,000) as disgorgement of commissions and other monies as specified in the SEC Final Judgment;
3. Two million dollars five hundred thousand dollars (\$2,500,000) to be used for the procurement of independent research, as described in the SEC Final Judgment;

1 TWP agrees that it shall not seek or accept, directly or indirectly, reimbursement or
2 indemnification, including, but not limited to payment made pursuant to any insurance
3 policy, with regard to all penalty amounts that TWP shall pay pursuant to this Order or
4 Section II of the SEC Final Judgment, regardless of whether such penalty amounts or any
5 part thereof are added to the Distribution Fund Account referred to in the SEC Final
6 Judgment or otherwise used for the benefit of investors.

7 TWP further agrees that it shall not claim, assert, or apply for a tax deduction or tax
8 credit with regard to any state, federal or local tax for any penalty amounts that TWP shall
9 pay pursuant to this Order or Section II of the SEC Final Judgment, regardless of whether
10 such penalty amounts or any part thereof are added to the Distribution Fund Account
11 referred to in the SEC Final Judgment or otherwise used for the benefit of investors. TWP
12 understands and acknowledges that these provisions are not intended to imply that the
13 Commissioner would agree that any other amounts TWP shall pay pursuant to the SEC
14 Final Judgment may be reimbursed or indemnified (whether pursuant to an insurance policy
15 or otherwise) under applicable law or may be the basis for any tax deduction or tax credit
16 with regard to any state, federal or local tax.

1 VI. GENERAL PROVISIONS

2 This Order and any dispute related thereto shall be construed and enforced in
3 accordance with, and governed by, the laws of the State of Delaware without regard to any
4 choice of law principles. The parties represent, warrant and agree that they have received
5 independent legal advice from their attorneys with respect to the advisability of executing
6 this Order.

7 TWP enters into this Consent Order voluntarily and represents that no threats, offers,
8 promises, or inducements of any kind have been made by the Commissioner or any
9 member, officer, employee, agent, or representative of the Commissioner to induce TWP to
10 enter into this Consent Order.

11 This Consent Order shall become final upon entry.

**CONSENT TO ENTRY OF
ADMINISTRATIVE ORDER BY TWP**

1. TWP hereby acknowledges that it has been served with a copy of this Administrative Order, has read the foregoing Order, is aware of its right to a hearing and appeal in this matter, and has waived the same.
2. TWP admits the jurisdiction of the Securities Commissioner for the State of Delaware, neither admits nor denies the Findings of Fact and Conclusions of Law contained in this Order; and consents to entry of this Order by the Commissioner as settlement of the issues contained in this Order.
3. TWP states that no promise of any kind or nature whatsoever was made to it to induce it to enter into this Order and that it has entered into this Order voluntarily.
4. TWP understands that the Commissioner may make such public announcement concerning this agreement and the subject matter thereof as the Commissioner may deem appropriate.

David Baylor represents that he is Chief Administrative Officer of TWP and that, as such, has been authorized by TWP to enter into this Order for and on behalf of TWP.

Dated this 19 day of August, 2005

Thomas Weisel Partners, LLC

By: David Baylor

Title: Chief Administrative officer

SUBSCRIBED AND SWORN TO before me this 19 day of August, 2005.

[Signature]

Notary Public

My Commission expires: Oct. 1, 2006
